(54) SERIAL PRINTER SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a means for giving a proper tension to a wire or a wire even under the state that the shaft of an idler pulley is fixed.

SOLUTION: In a serial printer system, in which recording is performed by jetting ink drops from a recording head, the adjustment of the mounting tension of a belt or a wire 6 for scanning the recording head is performed by a portion attached to the carriage 1 of the belt or the wire 6. By adjusting the amount of deflection of the belt or the wire 6 of a portion between the supporting parts 1a and 1b of the belt or of the wire 6 with a tension adjusting external thread 11, the mounting tension of the belt or of the wire 6 is performed.
